### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Geza Ziegler on 3/5/04.

The application has been amended as follows:

#### **In the Claims:**

1. Cancel claims 1-13 and 22-27
2. In claim 14 line 8, change "activation the" to --activation, the--.
3. In claim 20 line 12, change "when activated" to --when heat activated--.

#### ***Allowable Subject Matter***

2. Claims 14-21 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowability of claims 14-19 is the inclusion therein, in combination of the limitation of a flexible conductive body comprising a shape memory material formed in a first position and set into a second, compressed position, and upon heat activation, the flexible conductive body in a third, expanded position . This limitation is found in claims 14-19 and is neither disclosed nor taught by the prior art of record, alone or in combination.

The primary reason for the allowability of claims 20-21 is the inclusion therein, in combination of the limitation of a conductive body comprising a shape memory material formed in a first, uncompressed state, in a second compressed state, and in a third state when heat activated to expand from the second compressed to the third state. This limitation is found in claims 20-21 and is neither disclosed nor taught by the prior art of record, alone or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### ***Response to Arguments***

4. Applicant's arguments and amendments filed December 4, 2003 have been fully considered and finds the argument along with the amendments to the claim persuasive. Applicant argued that Berger does not disclose a shape memory material, and also that the conductive body is set into a second compressed position, nor expansion upon heat activation into third position.
